- Module 5
- Scope Management
- Required Readings
- **Module 5 Workshop Activity**
- Support materials - How to build a WBS
- Support materials - tips - ideas
- Module 5 Discussion: Scope Management
- Want to go deeper?
- Assessment
- Reflective Questions

Module 5 Workshop Activity

ACTIVITY

In this exercise, we will work to define and manage our scope for the Car Parking System.

Part One

Based on your understanding of the University and the car parking situation:

- Identify the primary requirements for the project

- Decide how you will document these requirements

- Decide on a SDLC for this project

Part Two

Based on your findings from Part One, develop a Work Breakdown Structure for the project. You will need to base your WBS on the selected SDLC, and on the scope you have defined. Draw up your WBS as a tree diagram.
